The host television broadcaster will conduct a detailed site survey of each venue to determine camera, press box and host locations. Please note depending on the venue, possible seat kills to accommodate television camera and cabling access may be necessary.

If all arena venues do not meet the following requirements, the cost to upgrade the facilities will be the sole responsibility of the Host Organizing Committee.

1. **LIGHTING**
   Between 100 and 150 foot candles;
   - Flat lighting - one color temperature.

2. **POWER**
   - 200 amp / 208 volts / 3 PH (3 phase) - 400 amp is ideal.
   - Power source should be within 150 feet of the mobile parking position.
   - Adequate house power in both the press box and the designated studio area.
   - House power should be 30 amps / 110 volts.

3. **CABLE ACCESS**
   - Easy cable access into the building, i.e. through cable hatch or door left open.
   - Cable access same side as mobile parking or easy access to press box side.

4. **PRESS BOX**
   - Minimum size for press box is to host a maximum of 20 media in main venue.
   - In addition, press box should be able to accommodate a minimum of three (3) sets of commentators (i.e. isolated broadcast booths) for radio and TV.
   - Adequate distance from near boards to cameras 1 and 2, i.e. at least 24 feet from the near boards to the main play-by-play and tight follow positions, otherwise a camera position (scaffold or platform) would have to be built which may result in several seat cancellations.
   - Arena should have both a penalty and shot clock viewable from press box.

5. **CAMERA POSITIONS**
   - Cameras 1 and 2 - tight follow and play-by-play - should be placed in the press box (if press box cannot accommodate the two cameras, this could result in seat cancellations at the back row of seating on a platform on either the lower level or, where applicable, the upper level seating.
   - There is the possibility of a third camera (iso) positioned next to cameras 1 and 2 in the press box or higher position.
   - Camera 3 - high end zone/hard - will result in seat cancellations or, depending upon the venue, placement could be at the back of a row on a two (2) foot riser. May also require room for a platform for the on-camera host position that may result in further seat cancellations.
• Camera 4 - opposite low – hand held at ice level. Possible seat cancellations;
• Camera 5 - opposite low - at ice level. Possible seat cancellations;
• If there are split benches - hard reverse angle camera at the top opposite concourse;
• Studio requirements for all Hockey Canada approved TV broadcasters (size of referee’s room or First Aid room would be acceptable) for intermissions and voice-overs;

6. **FLASH ZONE**
   - Minimum of 10’x10’ space allocation for the flash zone that is accessible from both the ice and dressing rooms.
   - Access to electrical outlets.
